NEW JOBS & INCREASED MANUFACTURING PRESENCE FOR SOUTHEAST CT - SECONN FABRICATION INTRODUCES SOLAR FABRICATORS

Seconn Fabrication, known for manufacturing tenacity, market aggressiveness, service-oriented speed and technology-leadership, announces the latest addition to the Seconn family of companies, SOLAR Fabricators. Seconn has been distinguished with bringing manufacturing back to America, and now SOLAR Fabricators will further invigorate America's innovation and ingenuity.

"As we grew, the look and feel of our operation changed, and our small business friends and neighbors started to feel less special. It became apparent to me that we needed to do something to stay ultra-connected with the local businesses, inventors, entrepreneurs, and communities around us. So, in order to stay true to the customer intimacy that we're known for, we engineered an optimal solution by forming the newest member of the Seconn family, SOLAR Fabricators. Just down the street, the former Crown Manufacturing is now SOLAR Fabricators, a Seconn company." said Robert Marelli, owner, Seconn Fabrication.

SOLAR Fabricators is intentionally designed for intimacy - the type of connection that inventors, entrepreneurs and key commercial businesses need in order to flourish. With the same Seconn values and many of the same faces, American innovators can trust that SOLAR Fabricators is there for them. With significant investment in new state-of-the-art equipment, facility upgrades, and energized, experienced professionals, SOLAR Fabricators is well-poised to propel American success in the 21st Century.
